Case History:

I am ready for challenges and to attack any obstacles head on. I am exhilarated by a changing and dynamic work environment. I adapt quickly to my environment. Change makes me stronger. I enjoy dynamic and creative organization solutions. When faced with a problem I investigate all possible outcomes before selecting the appropriate solution. I enjoy the process that leads to successful and innovative results. I have a passion for layout, color, texture and type. I enjoy fresh design and new fonts. My knowledge of both print and design makes me a desirable and marketable talent.

And my mom thinks I'm the best designer in the entire world.
